

LE TUNG DUONG

INTERN FRONTEND DEVELOPER

+84 86 56 41682 | letungduong1624@gmail.com | duongle.site

PROFILE SUMMARY

Aspiring Frontend Intern with strong foundation in ReactJS (Next.js) and TypeScript. Capable of building complete web interfaces, managing state, and integrating RESTful APIs. Eager to apply logical thinking to real-world projects at 3NESTInvest.

SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript
 - **Frontend:** ReactJS, Next.js, HTML5, CSS3, TailwindCSS
 - **Backend:** NodeJS, ExpressJS, NestJS
 - **Database:** PostgreSQL, MySQL, MongoDB, Prisma (ORM)
 - **Other:** Git/Github, Docker, Postman
-

PROJECTS

1. Flashup - English Vocabulary Learning App

Role: Frontend Developer (Fullstack approach)

Description: Flashcard-based English vocabulary learning application integrated with Spaced Repetition System (SM-2/Anki) to optimize long-term memory retention.

Technologies: Next.js, NestJS, Prisma

Key responsibilities:

- Developed modular RESTful APIs using NestJS and TypeScript; designed complex database schemas with PostgreSQL and Prisma ORM.
- Developed responsive and interactive user interfaces using Next.js, shadcn/ui and TailwindCSS, ensuring a seamless learning experience across devices.
- Implemented secure Authentication (JWT, Google OAuth) and role-based authorization.
- Integrated Gemini AI API for automated content generation and Mailjet for email services.
- Containerized the application with Docker for consistent deployment.

2. Personal Portfolio Application

Role: Frontend Developer (Fullstack approach)

Description: Personal portfolio application with project showcases and blogs.

Technologies: Next.js, NestJS, Prisma

Key responsibilities:

- Designed a modern, performance-optimized frontend with Next.js (Server-Side Rendering) to improve SEO and page load speed.
- Built a backend CMS for managing blogs and projects using NestJS and Prisma.
- Handled file uploads/management via Cloudinary API and integrated Resend for email functionality.
- Deployed services using Docker.
